

The antenna ground plane kit type ATP-1827/02 was designed for quick and easy deployment of our VHF/UHF mobile antennas types AD-18/... and AD-27/... in a tactical environment. The kit radials form the ground plane for increased antenna performance. Radials are made of aluminum alloy, protected with iridite finish and painted with UV resistant PU paint. Complete GP kit is packed in a handy canvas bag suitable for packing also the antenna elements (antenna base and radiators).

MECHANICAL SPECIFICATIONS:	
Design	Center Mount - 3 radials
Material	High Grade Aluminum Alloy 6061-T6
Surface Treatment	Joints Stainless Steel
Height	Iridite Finish + MIL Green PU paint
Weight	1.2 m
	Approx. 6 kg
